ELIGIBILITY

Individuals who are homebound and require the need for skilled nursing care or therapy services are eligible for home care.

Homebound is defined by Medicare as "Considerable and taxing effort to leave the home infrequently and for short duration of time." You may be temporarily home-bound due to illness or injury.

COVERAGE

Medicare pays 100% of the cost for home health care for individuals 65 or over or individuals who are permanently disabled. Private insurance will also cover home health care services. Whether you have Medicare or a private plan, WKM will work with you and your provider to make sure you get the care you need.
